Education

University of Petroleum and Energy Studies (UPES), Dehradun <i>Bachelor of Technology in Computer Science - GPA: 7.8</i>	<i>Aug 2023 – Jul 2027</i>
St. Theresa's Convent School <i>Higher Secondary Certificate (Class XII) - GPA: 9.2</i>	<i>Mar 2012 – Apr 2023</i>

Skills

Programming Languages: Python, Java, C++, Typescript
Data Development Skills: Data Cleaning, Data Analysis, Feature Extraction, REST APIs, File Handling
Analytics & Visualization: Excel, R, Power BI, Tableau
Version Control & Collaboration: Git, GitHub
Tools & Platforms: VS Code, RStudio, Jupyter, n8n, Docker
Operating Systems: Linux, Windows

Experience

Century Plyboards (India) Ltd. – On-Site Data Analyst Intern	<i>Jun 2025 – Aug 2025</i>
--	----------------------------

- Analyzed business and operational data to identify trends in sales, inventory, and logistics.
- Cleaned and structured raw datasets using Excel and R data-processing techniques.
- Supported data-driven reporting for internal teams and management.
- Managed data flows across manufacturing, distribution, and retail channels.
- Improved documentation and reporting accuracy through systematic data validation.

Projects

Tourism Growth Economic Impact Analysis (Saudi Vision 2030) <i>R, Excel, Data Visualization, Statistical Analysis</i>
• Analyzed tourism, expenditure, and infrastructure datasets to study economic impact under Vision 2030. • Created time-series and comparative visualizations to identify growth trends. • Examined relationships between tourism spending, international arrivals, and soft power indicators. • Presented insights using clear visual storytelling for academic evaluation.
Swing Vote Analysis & Electoral Trend Study <i>Python, Pandas, Data Visualization, Statistical Analysis</i>
• Analyzed historical election and voting pattern data to identify swing regions and fluctuating voter behavior. • Studied demographic, turnout, and past-result trends to understand factors influencing vote shifts. • Created visualizations to compare stable voting regions versus swing regions over multiple election cycles. • Focused on data-driven interpretation without political bias, emphasizing patterns and correlations.

Certifications

- Microsoft Power BI Data Analyst (PL-300) — Preparation Level
- IBM Data Science Professional Certificate
